23.11.2026 - Disclaimer: information subject to change.

The TBP2.1 drywall profile comes standard in a length of 200 cm and is suitable for LED strips with a maximum width of 11 mm. The profile is intended for use in cove lighting solutions and features wings on both sides of the frame. This makes it possible to install the profile directly into the frame construction (plasterboards are placed equal with the profile), resulting in a durable and indirect lighting experience.

Features

- Type: Drywall
- Max. width LED strip: 11 mm

Technical specifications:
