This compact AR70 lamp with GU10 socket operates with a variable light color (2000 to 2700K) and features a fine beam angle of 36° for ideal light distribution. To be combined with a suitable GU10 socket and GU10 compatible fixture of your choice.

In addition, this lamp is ideal when it comes to atmospheric lighting, which is made possible in part by the so-called 'dim to warm' technique. This technique enables the lamp to display a warmer light color based on the dimming setting of the lamp. So there is always a perfect atmosphere, regardless of the moment.
