An alternative lens for the 50W floodlight pro series.

The Floodlight for professional use is ideally suited for "heavy" applications. Think of areas where the lighting is mostly exposed to external weather conditions. Although this fixture has a favorable IP rating of IP66, it is also equipped with an external air pressure valve. This keeps air pressure inside and outside the fixture always the same and moisture inside the fixture has no chance. With various lens options optionally available, these Floodlights are also suitable for:

Lighting large buildings such as churches or historic buildings. (lens 60°)

Illuminating tennis courts or other sports fields. (Asymmetrical lens)

## Technical specifications:

|                                          |                                               |
