The PN20 LED profile has a standard length of 200 cm and is suitable for LED strips with a maximum width of 20 mm. The profile is suitable not only as a surface mount profile, but also as an independent linear lighting system. This is made possible by a combination of the PL10 cable lock or PL10.1 mounting profile, after which possible suspension is among the possibilities. The inside of the profile is characterized by a compact height of only 8.6 mm.

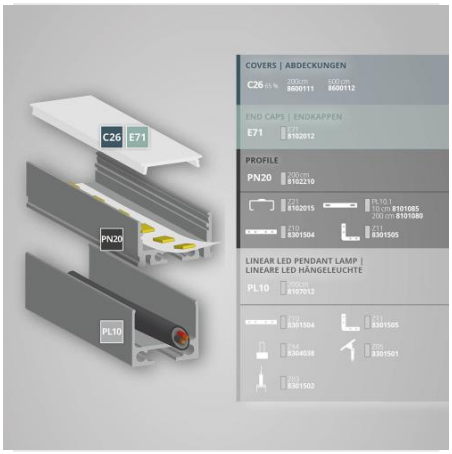

### Features

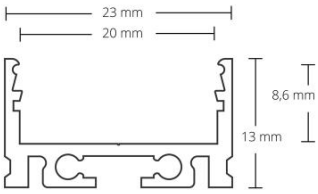

- Type: Surface
- Max. width LED strip: 20 mm
