The PN5 LED profile has a standard length of 200 cm and is suitable for LED strips with a maximum width of 24 mm. The profile is easily combined with covers in four different sizes, namely flat, high, very high or round. This makes it possible to work with a variable beam angle, depending on the chosen profile. In addition, this profile offers a large cooling surface, allowing even the most powerful LED strip to fit on the profile without problems.
