This SP50-24VFT power supply makes dimming LED fixtures on a phase cut basis much easier. This power supply is supplied with incoming voltage at 220V mains, which is then quickly converted to constant voltage at 24VDC. In addition, this LED power supply features up-to-date protection in terms of short circuit, overload and overheating. This ensures a longer lifespan for both the power supply and the LED lamps present.

Features

- Maximum power rating of 50 watts
- Compact design for easy installation
- IP20 certified for indoor use
